Benefit Report Best Practices Questionnaire

Describe the ways in which the benefit corporation pursued general public benefit during the year and the extent to which general public benefit was created.

The mission of 3P Partners, Inc. (d.b.a. PIPs Rewards or PIPs) is to shift social and behavioral norms by leveraging the power of points, smart tools and games to make 'positive impact' everyday choices 'cognitively easy,' fun and rewarding. Our award-winning platform is used by enterprise partners to boost retention and lift lifetime value among employees, students, members or fans — all through a fun, social mobile platform that mashes up smart tech, principals of behavioral psychology and a 'currency of change' to deepen engagement in beneficial choices.

In the past 12 months, PIPs has 1) brought on significant new enterprise partners, including a 32,000 student university, 2) launched its mobile app that, in addition to the earn, redeem and donate functions that are central to its web platform, includes new functionalities designed for enterprise partner engagement opportunities: 1) Fitness Challenge and Planet Health Challenge - fun, social, addictive games that encourages and rewards improved daily physical activity and carbon footprint reduction; and 2) Trivia contest - a group game for raising awareness and funds for a cause.

In addition, we launched Check In Rewards to the app, providing a unique geo-marketing opportunity for beneficial brands and services.

Thousands of PIPsters earned over 300,000 PIPs for positive impact choices they have made in 2016. Roughly one-third of these PIPs have been redeemed for great deals on beneficial brands and services and another quarter have been donated to progressive causes. We are expecting these numbers to grow significantly in 2017 now that we are in the market with our platform and large clients are coming aboard.

If applicable, describe the ways in which the benefit corporation pursued a specific public benefit that the articles of incorporation state it is the purpose of the benefit corporation to create and the extent the specific public benefit was created.

3P's corporate documents expressly state that it is to deliver personal and/or planetary benefit to its customers. The most specific public benefit 3P has delivered in the last 12 months has been with the rollout of PIPs Fitness Challenge. Utilizing data intelligence, gathered via tracking apps and devices, and applying principles of behavioral psychology, PIPs Fitness Challenge turns increased daily physical activity among groups [employees for example] into a fun, social and impactful game. Participants in the 3-mo. pilot saw marked improvement in daily physical fitness - 10 percent among all participants, 33 percent among the least active quartile. They were also able to track how much carbon was saved thanks to their walking rather than driving a car.

Players from dispersed offices liked the team aspect of the Challenge, for it gave them a greater sense of community and commitment to fellow employees. They also liked that PIPs could only be redeemed for healthier, socially responsible lifestyle choices.

Describe any circumstances that have hindered the creation by the benefit corporation of general public benefit or specific public benefit this period.

Nothing has hindered the creation of general or specific public benefit in the last 12 months.

Describe the process and rationale for selecting the third party standard used to prepare the benefit report

3P Partners is a benefit corporation in the State of New York, but zealously pursued both B Corp Certification and Green America Certification because we believe strongly in third-party certifications as the best way to communicate meaningful social attributes to our partners and customers. The application process was rigorous, took many hours and involved a lengthy interview. But there was never any doubt as to our rationale: Attaining B Corp and Green America certification is like getting the "Good Housekeeping Seal of Approval" for companies that use the power of business to deliver both social and financial benefit.

If applicable, provide an explanation for changing the third-party standard used to prepare the benefit report.

N/A.

If applicable, provide a statement of any connection between the organization that established the third-party standard, or its directors, officers or material owners, and the benefit corporation or its directors, officers or material shareholders, including any financial or governance relationship which might materially affect the credibility of the use of the third-party standard.

- Yes No
-

Impact Business Models: Customer Products & Services Introduction

- IBM16.2 How would you describe the positive outcome for customers created by your product/service? [Not Weighted]
- The primary concern of our customers is retention, whether their constituents are students, employees, fans or commuters. They are looking for an effective tool with which to leverage the growing interest in purposeful behaviors among stakeholders in ways that boost loyalty, retention and lifetime value. What they get with PIPs is a mobile engagement platform that combines a social good currency (positive impact points or PIPs), data intelligence, principals of behavioral psychology and group games, to turn behavior change into a fun, social, addictive experience that motivates and rewards improvement.

IBM16.3a Which of the following most closely matches the outcome and/or problem solved for your customers as defined above?
[Not Weighted]

- Access to products/services that fulfill basic human needs for individuals without prior access (e.g. providers of electricity or clean drinking water to rural poor communities, affordable housing projects, waste and sanitation systems or disposal)
- Improved or Maintained Health/Wellness (e.g. medical equipment, medical services and medicines, preventative health services or products, healthy living products, exercise and sporting products, prescription eyeglasses)
- Improved Education or Skills Development (e.g. schools, textbooks, tutoring services, career leadership training, education tools, games and software)
- Increased economic opportunity for underserved groups (e.g. financial or insurance services or benefits consulting for the underserved, new mechanisms to connect products to market)
- Increased operational success or capital for purpose driven or underserved enterprises (e.g. impact investing or fundraising platforms, non-profit accounting services)
- Increased social and/or environmental impact for businesses or other organizations (e.g. sustainability consulting)
- Increased Access to Arts, Media, or Culture (e.g. independent media, artisanal crafts, photography, information services)
- None of the above

IBM36.8 Please provide a brief description of how you track your customer/client/beneficiary figures. [Not Weighted]

The PIPs platform is a tracking app. It tracks and sorts every verifiable action taken by user, partner, campaign (event, challenge, contest, etc) and impact. In the specific case of the Fitness Challenge, the platform tracked - daily steps, improvement (measured against a four-week rolling average), how PIPs were used (either redeemed or donated). The dashboard also calculated carbon saved (as measured in car miles avoided).

IBM36.12 How do you verify that your product contributes to the outcome previously selected? [Least Weighted]

- We have a track record of successful verified positive outcomes and have created case studies based on these.
- There is secondary research that supports the link between our type of product and the stated outcome.
- We conduct our own direct research to track the outcomes produced for all our customers, such as impact-related surveys
- We have third party certifications or verifications that verify the efficacy of our product/service in delivering outcomes
- We have performed, commissioned, or partnered with scientifically designed impact or outcome assessments to systematically learn about our product's impact
- Our product is too early stage to have research or studies that link our product to positive outcomes
- We cannot provide verification of our outcomes at this time.

IBM36.13 If direct research on your product/service has been performed, did the results confirm that a desired outcome is being achieved? [Least Weighted]

- Yes

- NA

IBM36.14 Is there something different or innovative about the company's health product/service that has changed the industry? Is this something that is replicable, unique at the time that it was created, and that has been emulated by other organizations? [Not Weighted]

Many workplace fitness programs use the latest tracking apps and devices to gather data on physical activity. And offering rewards to top performers is also common. But if a staffer is not the office top performer, or within competing distance of the top, his or her enthusiasm can quickly wane. PIPs' digital engagement platform uses data intelligence, gathered via tracking apps and devices, and incentives like points and prizes. But in addition it applies principles of behavioral psychology (loss aversion, teams, etc) to turn increased daily fitness into fun, social games that rewards improvement. Proven effective in pilots, the Fitness Challenge is now being picked up by dozens of companies and affinity networks. Players have liked that the points can only be redeemed for healthy lifestyle choices or donated to a cause.

The PIPs platform features a trivia game that all individuals can play at any time.

Two new group games were added to the app in the last 12 months - the Fitness Challenge and the Trivia Contest. We are adapting the Fitness Challenge into a Planet Health Challenge for launch to a university partner in July 2017.

A typical Fitness Challenge runs for 12 weeks. It begins on a Monday at 12:01:01 AM and ends on a Sunday at

11:59:59 PM 12 weeks later. The Planet Health Challenge will run through the semester.

A Trivia Contest can vary in length from a few hours to several days.

IBM37.5 Please provide a brief description of how you track your customer/client/beneficiary figures. [Not Weighted]

PIPs tracks and records all actions for which PIPs are either earned or used.

In the case of the individual trivia game, every correct answer is tracked and recorded.

In the case of a Fitness Challenge commissioned by a client, the players' steps are tracked by a fitness app or device, and via API integration, communicated to the PIPs platform and stored in our backend.

Through algorithms, actions taken are converted into PIPs awarded, and these PIPs are tracked in a user's and a team's tally.

In the case of the Fitness Challenge, an algorithm also converts steps taken into carbon saved (as measured by car miles avoided).

PIPs offers its NGO partners a unique and innovative way to fundraise. The platform can function as an alternative crowdfunding platform, but unlike other crowdfunding platforms, there are no hefty fees, and the donor never cuts a check; they donate their PIPs, we cut the check. As our numbers grow, and more and more clients want to use the platform to drive charitable giving, we could see a significant impact.

IBM40.17 Does your company also measure and manage the negative or unintended outcomes generated by this business model? [Least Weighted]

IBM44.4 What % of your revenues last fiscal year were from the previous products or services? [Not Weighted]

IBM44.5 Please provide a brief description of how you track your customer/client/beneficiary figures. [Not Weighted]

The first use case of our platform - PIPs Fitness Challenge - demonstrates how we combine data intelligence, gathered via tracking apps and devices, and principles of behavioral psychology to turn increased daily physical activity among a group of employees, seniors, students or fans into a fun, social...and impactful game.

The research from these early use cases has shown that daily physical activity was improved by 10% among all players, 33% among the least active quartile. Surveys have also shown that players were motivated by 1) the fact that they would be awarded for improving (and not just for being the top performer), 2) being on a team and 3) by the fact that the PIPs they were being awarded could only be used for beneficial life style choices or donated to a cause.

We are now bringing our platform to more employers as well as to other client types - universities, sports teams and leagues, affinity networks, etc. Though it's a bit early for us to tell, our aim is for PIPs engagements to help increase loyalty, retention and lifetime value among their constituents.

IBM144.6 How many customers/clients/beneficiaries were served through the provision of the previous products or services during the last 12 months? IBM86.10 How do you verify that your product contributes to the outcome previously selected? [Least Weighted]

- We have a track record of successful, verified positive outcomes and have created case studies based on these.
- There is secondary research that supports the link between our type of product and the stated outcome.
- We conduct our own direct research to track the outcomes produced for all our customers, such as impact-related surveys
- We have third party certifications or verifications that verify the efficacy of our product/service in delivering outcomes
- We have performed, commissioned, or partnered with scientifically designed impact or outcome assessments to systematically learn about our product's impact
- Our product is too early stage to have research or studies that link our product to positive outcomes
- We cannot provide verification of our outcomes at this time.

Answer(s): Our platform is designed to verify that a specific actions have been taken. This is what we mean by "verify outcomes."

Though the action must deliver personal and/or planetary benefit, at this point, we are not able to quantify the cumulative benefit.

IBM86.11 If direct research on your product/service has been performed, did the results confirm that a desired outcome is being achieved? [Least Weighted]

- Yes No N/A - No direct research conducted

IBM86.12 Does your company also measure and manage the negative or unintended outcomes generated by this business model? [Least Weighted]

IBM86.13 Is there something different or innovative about the product/service that has changed the industry? Is this something that is replicable, unique at the time that it was created, and that has been emulated by other organizations? [Not Weighted]

The PIPs platform is poised to transform the 'behavior tech' space. We are able to deliver to enterprise partners verifiable engagement in beneficial behaviors that reduce costs, increase loyalty, productivity and lifetime value of target user groups. We tested our platform among employers looking to increase daily physical activity among employees. Daily physical activity increased by 10% among all participants, 33% among the least active quartile. Participants also experienced heightened sense of workplace satisfaction. We are now rolling out versions of the platform to universities, pro- and collegiate sports teams and more.
